Detailed Rationale

Crisil Ratings has assigned its '**Crisil A/Stable**' rating to Rs 600 crore non-convertible debentures of KrazyBee Services Private Limited (KrazyBee) and has reaffirmed its 'Crisil A/Stable/Crisil A1' ratings on the existing debt instruments and bank facilities.

KrazyBee and Finnovation Technology Solutions Pvt Ltd (Finnovation; entity housing technological platform of KrazyBee) are together referred herein to as the KrazyBee group.

The rating continues to factor in the sustenance of healthy earnings profile of the group whilst scaling up in the loan portfolio in the last few years. The group's profitability has been able to consistently improve as reflected in return on managed assets (RoMA) rising to 4.8% in fiscal 2025 from 4.0% in fiscal 2024 and 2.3% in fiscal 2023. Though the credits cost (as a percentage of average managed assets) increased to 7.7% as on March 31, 2025 from 6.1% as on March 31, 2024, profitability in fiscal 2025 has been supported by a reduction in the operating expenses (as a percentage of average managed assets) to 9.5% as on March 31, 2025 from 12.5% as on March 31, 2024 and 16.0% as on March 31, 2023.

Furthermore, the group's scale of operations continues to increase with the assets under management (AUM) growth of ~32% in fiscal 2025 to Rs 10,102 crore as on March 31, 2025, from Rs 7,644 crore as on March 31, 2024 (Rs 4,644 crore as on March 31, 2023). Disbursements, too, grew by ~19% in fiscal 2025 to ~Rs 24,647 crore in fiscal 2025. The company primarily provides personal loans, which formed ~92% of the overall AUM as on March 31, 2025. It has also forayed into business loans as well as loan against property (LAP), which are at a nascent stage and constitutes ~8% of the overall AUM. Besides own book, the company also has a co-lending book which constituted ~42% of the overall AUM as on March 31, 2025 (~38% as on March 31, 2024). Ability to sustain improvement in profitability, while further scaling up operations will remain monitorable over the medium term.

Furthermore, the capitalisation profile of the group also remains healthy, with networth of Rs 3,219 crore as on March 31, 2025 (Rs 2,630 crore as on March 31, 2024) and gearing of 1.1 times as on March 31, 2025 (1.0 times as on March 31, 2024). This is driven by regular equity infusion in the past and strong backing from private equity (PE) and financial institutions such as Premji Invest, Advent International, MUFG Bank, TPG NewQuest Capital, Motilal Oswal, amongst others.

The ratings also continue to factor in the group's scalable business model equipped with technology for end-to-end operations and a strong management team. These strengths are partially offset by the inherent vulnerability of asset quality metrics given the segment of borrowers. Any material adverse impact on the business risk profile because of regulatory changes will be monitorable.

Crisil Ratings also takes note of the organisational restructuring in July 2024, wherein the earlier parent company of KrazyBee as well as Finnovation, Finnov Pvt Ltd, was dissolved, and its shareholders became direct shareholders in both KrazyBee and Finnovation. Furthermore, in May 2025, the group also announced to merge KrazyBee and Finnovation. Crisil Ratings will continue to track progress in this regard.

Analytical Approach

For arriving at the ratings, Crisil Ratings has considered the consolidated business and financial risk profiles of KrazyBee and Finnovation.

Please refer Annexure - List of Entities Consolidated, which captures the list of entities considered and their analytical treatment of consolidation.

Key Rating Drivers & Detailed Description

Strengths:

Healthy capitalisation metrics: Since inception, the group has raised equity of ~Rs 2,100 crore in primary infusion and an additional over Rs 700 crore in secondary share sale. Owing to timely capital infusion and consistent profitability, the group has strong network of Rs 3,219 crore as on March 31, 2025, as compared with network of Rs 2,630 crore as on March 31, 2024. The group's gearing also stood comfortable at 1.1 times as on March 31, 2025. On a standalone level too, KrazyBee had a healthy network of Rs 2,356 crore and gearing of 1.5 times as on March 31, 2025. On a steady-state basis, Crisil Ratings expects the gearing to stay below 3 times. The ability of the group to raise capital on an ongoing basis to fund growth momentum will remain monitorable.

Scalable business model led by strong tech platform: KrazyBee offers unsecured personal loans of up to Rs 5 lakh to young professionals for a tenure of up to 48 months. The company has a fully automated digital lending model with the loan origination happening through the mobile application 'KreditBee', owned by the group company, Finnovation.

The origination and disbursements of loans happen through KreditBee app, which has an integrated in-house technology platform, with an interactive user-friendly app and website to facilitate the borrowers to apply for loans. The platform has tie-ups with partner lenders. It has end-to-end integration in terms of loan origination, risk assessment and collections. It is also integrated with partner lenders, allowing for seamless operations and accounting.

Despite the increase in the average tenure of the loans, disbursements continue to rise at healthy pace, reaching Rs 24,647 crore in fiscal 2025 as compared with Rs 5,796 crore in fiscal 2022, registering a 3-year compounded annual growth rate (CAGR) of ~62%. With increased disbursements, AUM grew to Rs 10,102 crore as on March 31, 2025, from Rs 1,951 crore as on March 31, 2022, registering a CAGR of ~73%. Besides personal loans, the company also provides business loans as well as LAP, which are at a nascent stage, with an AUM of ~Rs 837 crore as on March 31, 2025.

Healthy earnings profile; sustenance to be monitored: Given the business model, the group generates revenue primarily from interest income from the loans extended by KrazyBee and processing fees earned from disbursement. The company reported a profit after tax (PAT) of Rs 473 crore for fiscal 2025, resulting in a RoMA of 4.8% while the same during fiscal 2024 was at Rs 285 crore and 4.0%, respectively. Though net interest margin (NIM) (on total income basis) as well as credit cost (as a percentage of average managed assets) moderated in fiscal 2025, profitability was supported by a reduction in the operating expenses (as a percentage of average managed assets). NIM (on total income basis) moderated to 23.5% for fiscal 2025, from 24.0% for fiscal 2024 and 27.5% for fiscal 2023 on account of gradual reduction in average yield. Credit costs (as a percentage of average managed assets) also increased to 7.7% for fiscal 2025 from 6.1% in fiscal 2024. However, operating costs (as a percentage of average managed assets), which though elevated, reduced to 9.5% for fiscal 2025 as compared with 12.5% for fiscal 2024. The ability of the company to sustain the improvement in the earnings profile will remain monitorable over the medium term.

Weakness:

Vulnerability in asset quality owing to risks associated with borrower class: The company provides unsecured loans to young professionals, wherein asset quality metrics remain vulnerable to slippages. Also, with the company carrying an aggressive write-off policy, wherein it writes off loans at 180 days past due (dpd), asset quality metrics are measured post adjusting for write-offs during the period. The 90+ dpd for the company, adjusted for the last 12-month write-offs, stood high at 6.7% as on March 31, 2025, as against 4.3% as on March 31, 2024.

However, the company has shifted its focus to borrowers with better credit. Of the total disbursements since April 2022, over 90% has been towards borrowers with CIBIL score greater than 700; as against earlier wherein CIBIL score under 700 used to account for ~60% of total disbursements. Additionally, over 80% of the disbursements are to repeat borrowers with a track record with KrazyBee. Further, recent and new originations have also been performing well, as evidenced by the current 90 PAR (static) across loan tenure buckets.

Given the inherent nature of its product segment, the ability of KrazyBee to sustain comfortable levels of asset quality metrics whilst increasing its scale of operations remains monitorable.

Liquidity: Adequate

Asset-liability maturity profile of KrazyBee stood comfortable, with cumulative positive mismatches across all time buckets as on March 31, 2025. At a consolidated level, unencumbered cash and equivalents (including unutilised cash credit/ working capital demand loan lines) stood at around Rs 815 crore as on June 30, 2025, which is sufficient to cover for over two months of repayments.

Outlook: Stable

Crisil Ratings believes the group will maintain healthy capitalisation metrics as well as earnings profile. Sustainability of comfortable asset quality performance will be a key monitorable.

Rating sensitivity factors

- Adverse movement in asset quality leading to substantial impact on earnings and capitalisation metrics
